

MLC Mobile

The mobile solution that gives barristers the freedom to work efficiently from any location, at any time

Immediate, unlimited access

MLC now offers barristers the flexibility and freedom to work efficiently wherever they are located. You can be equally productive in the office, at home, in court or when travelling.

Secure remote working

Because you can access Mobile MLC from any device or location, you instantly have the information you need, with none of the security risks associated with losing data that has been saved on internal systems or in paper format.

Multi-factor authentication goes beyond standard password protection. It can be enabled in an individual's settings or be made mandatory by chambers.

Flexible time capture

Ensure you never miss a billable minute again. Every second you are working on documents or emails can be captured by our intelligent time recording tools that synchronise across multiple devices. Mobile MLC also allows you to create, edit or view time entries.

Barristers can create multiple timers that allow all activity to be tracked when a barrister is moving through numerous tasks to ensure

no billable time is missed. They can also choose to display time records in their diary for an easy view of where time has been spent. Draft time records can be produced, and time events can also be marked as non-billable.

Chambers can now add, and customise, new time fields for barristers to fill in when they're submitting time records. This provides clerks with the additional information, such as case type or the size of a bundle, that may be required to correctly process time records.

Monitor your budget

Our integrated timesheet keeps you on track by allowing you to monitor your performance against daily time and fee budgets and to review your billed time for the day, week, month or year.

The convenient reports feature in MLC offers a number of reports to help you stay on top of any monies owed to you. When barristers complete their own reports within Mobile MLC they can provide them in Excel format.

This flexible, user friendly format allows easier editing of aged debt, work done and payment summary reports.

MLC Mobile

Easy diary management

Mobile MLC offers Outlook integration of diaries, tasks, key dates, bookings and opportunities. All work in tandem to ensure barristers can see their schedules and easily prioritise their workload.

Risk management

To minimise your GDPR risk and liability, MLC provides all of the tools you need to manage the acquisition and maintenance of personal data, including rights of access and consent.

Effective marketing communications

MLC's intelligent, built-in CRM capability allows you to manage all client data in a way that can enhance your marketing activities.

To support your growth, MLC provides the data tools that can support your client retention efforts and provide a better understanding of prospective clients, helping you to clearly identify more lucrative opportunities.

Key benefits

- > System availability 24/7, from any location
- > Supports paper-lite work methods
- > Modern user interface
- > Robust security and compliance built-in
- > Dynamic time recording function enables the capture of every billable minute
- > Direct access to support

"Mobility has been central to our ability to continue working. Now, we can work efficiently from any location in a GDPR-compliant manner, with secure access to the case details required. It's so much more convenient for our barristers."
