

ALB Accounts

With over 20 years of experience working within the legal market, we understand the challenges which law firms are facing in an increasingly competitive space. We work with firms of all size and speciality across the UK and Ireland to increase efficiencies and ensure you have the right tools to grow.

In today's legal sector, where there is an increased drive towards efficiency, embracing an effective accounting solution can help you become more successful and grow your firm.

Our accounts only solution is built to increase efficiency within small accounting teams in law firms. Our knowledge of the marketplace means we understand there are specific requirements law firms have in order to run an effective and successful accounting team.

Accounts only

Our solution is specifically designed to help cashiers, secretaries and fee earners track spending, safeguard client monies, record time, simplify billing, control Work In Progress (WIP), manage profit and loss and perform client due diligence with ease.

By implementing an accounts only solution, small law firms and sole practitioners can manage their firm more easily on a day to day basis. At Advanced, we understand how niche legal accounting can be compared to other industries, and our technology is focused on enabling firms to manage accounts in the best possible way.

Accessible and secure

The solution is hosted via our private Cloud, and is accessible from any location. Using one, integrated system means multiple staff members within your firm can access accounts and make changes whenever and wherever they need to. Firms can also benefit from our high levels of security, and eliminate the risk of working from multiple spreadsheets.

Simple to use

Our technology is built with a modern, user-friendly interface to ensure staff can navigate the system quickly and with ease in order to accurately manage a firm's accounts. Using a system which also aids compliance means there is less human error, and your staff can be reassured they have a solution which encourages them to comply with the SRA Accounts Rules

An effective low-cost accounting solution

Accessible training

Training is easily accessible to users online, and there is also additional access to a training consultant. All training is recorded so that users can re-visit training on demand, giving them the confidence to navigate and fully utilise the system.

Working more efficiently

Instead of running a law firm from multiple spreadsheets and paper files, our solution enables a firm's accounts to be in one place so that staff are able to get tasks done in a more efficient way. Saving time by handling accounts in one central system also reduces costs, thus improving the financial health of a practice especially for new start-ups or firms with few staff.

Opportunities to grow within the ALB portfolio

Our solution is perfect for forward thinking firms who want to improve revenue and increase efficiencies. As small firms grow there is an opportunity to upgrade software to include Practice and Case Management systems within our solution portfolio, offering enhanced functionality and integrated legal modules which will continue to improve the efficiency and success of small firms looking to improve their processes.

Low cost, efficient legal accounting

With our solution users will have access to:

- > Accounts positings
- > Billing
- > Nominal postings and journals
- > Bank reconciliation
- > VAT return
- > Interest calaculations
- > Time recording
- > Client and matter creation
- > Arhciving
- > Dashboards
