

## PRM Medical Stock Management

We are a leading provider in Medical Stock Management, providing an inventory management solution to Trusts across the UK to manage their stock and save them thousands of pounds.

We understand the importance of high stock visibility and replenishment, so at Advanced, we offer a solution to replace inefficient and costly paper-based stock management processes.

### Features

At the core functionality of our solution is our stock management module. This module allows you to manage stock levels by product and location, stock transfer and generate replenishment orders.

The advantages include:

- > Product catalogue search
- > Maintenance of product pricing
- > Replenishment directly from the supplier
- > Up to the minute stock information
- > Drive changes based on evidence

### Operation recording

We understand the importance of stock control, so our operation recording module provides core functionality of recording product usage against clinician, procedure and patient. We

provide easy to use data capture, designed specifically to keep clinicians' workloads to a minimum, whilst providing maximum benefit.

The advantages include:

- > Resource usage
- > Operation outcome
- > Forward planning of operations, resources and equipment

### Materials Management

We understand that you need to forward plan your stock, so our materials management solution provides you with a top-up replenishment functionality for tablet computers, which is web based and therefore can work on all devices.

The advantages include:

- > Top up materials management
- > Suitable for use by both Materials Management staff and clinical staff
- > Rolling stock count

*"Stock checks can now be done with a touch of a button. Before PRM, staff had to be gathered at a weekend to count and record all stock items. This was very labour-intensive, open to errors and couldn't provide a real-time, holistic view of stock across the theatres."*

Fred Cock > Clinical Services Manager > Royal Cornwall Hospitals NHS Trust

## Track and trace

We know the importance of needing to know where your stock is, so our track and trace module provides enhanced traceability of products through the inventory management process.

The advantages include:

- > Generation of unique serialised barcode at goods receipting
- > Capture of all unique product information
- > Expiry date monitoring

## Interactive dashboards

An understanding of how you are performing is vital in any organisation, so we provide you with an enhanced interactive graphical reporting function. Not only can you monitor your activity of PRM, you can build interactive dashboards from any available data source, such as HR and operational systems.

The advantages include:

- > Highly configurable to suit your individual needs
- > Visual alerts and KPIs
- > Comparison analytics
- > Stock & Operation activity visual reporting

## Benefits

Efficiency, cost savings: Our solution allows you to considerably improve stock control

Quick stock checks - Stock checks can be done quickly and efficiently, rather than staff performing labour-intensive tasks

Rapid implementation

Single solution

Up to the minute stock information
