

Progresso School and academies

Progresso is our cloud based management information system (MIS) designed specifically for schools and academies to save money on expensive onsite hardware and time, removing the need to manage software upgrades and back-ups. It puts the right information in the hands of the right people at the right time – helping you to drive learning.

We know that a quality MIS should be used as a learning tool, not just a data storage system. With Progresso teachers, parents and senior leaders, can get instant access to up-to-date information about individuals and groups of learners. Progresso allows teachers to teach and learners to learn.

Features

Progresso contains a complete range of MIS modules. These are all contained in the application, no bolt-ons or additional fees for extra functionality.

- > Attendance

Giving teachers more time and improving learner outcomes

Progresso puts schools in control of their school data. Simply put: You can run your school your way. Our solution will provide you with the freedom to interact with your data, enabling you to quickly input, monitor, track and evaluate learner progress against school Progress 8 targets and individual learner targets. Progresso takes an anywhere, anytime approach to data and this information can be shared with leaders, other teachers and even parents on any internet enabled device. This gives an up-to-the minute view of each learner's progress.

Progresso

For Multi-Academy Trusts, this information can be shared and viewed across sites, no more long email chains, spreadsheets or even paper reports sent between schools.

Progresso tools allow teachers and senior leaders to explore and interrogate their school data intuitively, swiftly identifying areas of concern, allowing them to intervene to resolve those issues.

Data that is always ready for inspection

Ofsted often requests accurate data be presented thoroughly and quickly during their inspection period. When Ofsted come calling, you can be confident that Progresso gives you the latest information.

All stakeholders can securely access real-time analysis and student information from anywhere, using any device. This includes data on assessment and progression, attendance and behaviour. Pupils can be grouped by any criteria, such as those receiving Pupil Premium.

With Progresso, staff can create a range of the most popular school reports to inform all stakeholders of attendance, assessment and behaviour of individual learners. In addition to this Progresso provides unique insight to enable effective pupil tracking or to highlights trends or patterns across the school.

This functionality can be completely customised for each individual school or academy, making sure staff can track any aspect of learner's development.

Benefits

- > **Improve learner outcomes** – greater interaction with data to quickly input, monitor, track and evaluate learner progress against targets.
- > **Be ready for inspection** – quick and easy access to accurate data at all times.
- > **Free up teacher time** – customisable report building to take the time and hassle out of reporting.

“Above everything, accessibility was the most important factor in terms of us requiring a cloud-based solution. We wanted all staff, parents and students to be able to log in from wherever they were at whatever time, using a range of mobile devices.”

Gary Spracklen >
Head of Digital and Innovation, The Isle of Portland Aldridge Community Academy (IPACA)
