

# Hunwick Engineering Case study

## Find out more about Hunwick Engineering's growth and development using Business Cloud Essentials

### About Hunwick Engineering

Hunwick Engineering are a manufacturing organisation located in Gosfield, East of England. The business was established in 1909, becoming one of the leaders in industry specialist processes and heavy engineering solutions up to this date. Hunwick Engineering is the first off-grid, large-scale engineering facility in the UK to be carbon neutral, as they're powered completely by green energy (which is all produced on-site).

Hunwick Engineering is part of a joint venture between Park Hall (Gosfield) Ltd and Alloy Fab Weld Ltd. Hunwick are continuously looking to the future, with a strong focus on modernising their operation and adapting to market changes.

### Hunwick's Advanced Experience

Business Cloud Essentials is the first business management solution the business has adopted. Before the implementation process, everything was completed using spreadsheets and notepads. When we asked Darren about what he liked most about the software, he told us:

**"The reporting tools in Business Cloud Essentials are very useful for daily monitoring of operations. All the information you need is in one place."**

Running your business is not easy, especially during a pandemic. Of late, Hunwick Engineering has had to deal with absences and adapt their operations to ensure all their staff were safe in the workplace. Having good software support during this time was crucial:

**"Not having to wait huge amounts of time on hold with the support team is very reassuring. The software is really great, but an added bonus is knowing the support team is there for you no matter what happens."**

Having the right team and the right software makes everything easier. We're proud to be able to support Hunwick Engineering in their growth journey.

**"I was asked by the chairman what was the right solution for our business. The answer was, and still is, Business Cloud Essentials."**

**"One thing we like about Business Cloud Essentials is the fact that there are no hidden costs.** You don't have to pay for updates. With each automatic update, you gain full access to new functionalities."

Darren Hills, Finance Director at Hunwick Engineering

### Why Business Cloud Essentials?

"The software was built by someone with an accounting and manufacturing background. This made a huge difference during our decision-making process as we are a manufacturing business."

### Communication with the Advanced team

"The support team take all our suggestions on board and we really feel our voices are heard by the team at Advanced, which makes a huge difference."

### Implementation process

"Before Business Cloud Essentials, we were using paper notes and spreadsheets. As the business continued to grow, we knew we needed to modernise and automate our processes."

### Darren Hills' approach to Business Cloud Essentials

"The software was growing and so were we. Business Cloud Essentials is a perfect fit for us."
