

Cloud Financials

We understand that in a changing workplace, finance teams face competing demands, with the need to boost productivity and demonstrate effectiveness whilst delivering accurate management information across an entire business in real-time.

Our 2017 Cloud survey has revealed that many organisations also face continued threats to the security of sensitive financial data, coupled with the scrutiny of regulators. In order to keep up with the pace of change in the digital age, and the associated pressures on their time and resources, finance teams are finding they need to change working practices and utilise latest web and Cloud technologies.

Cloud Financials offers all the capabilities of a traditional on-premise accounting system solution, with the added benefit of being able to access real-time finance data anywhere, anytime via the web. Our Cloud-based accounting solution provides a core financial management system with functionality built for the future, enabling organisations to manage their multiple business units and view data from across the company, with powerful reporting and legislative capabilities. In addition, our Cloud Financials service manages the delivery and maintenance of the system, so finance and IT teams can instead focus on value add activities for the business.

Powerful reporting

The extensive reporting capabilities of Cloud Financials enable you to meet internal, statutory and regulatory reporting requirements, providing you with instant data analysis for informed decision making.

Scalable and flexible to your needs

Benefit from greater agility by managing Cloud Financials via a Software-as-a-Service subscription plan. Our subscription basis means you can easily scale your system in line with your organisational processes and growth plans, both today and tomorrow, ensuring you are equipped to manage any future system or budget challenges.

Anytime, anywhere on multiple platforms

Cloud Financials gives you instant access to suit your needs. Users can simply login to the solution online, wherever and whenever, significantly reducing operating costs and accommodating the increasing mobility of the modern workforce.

Cloud-based financial management system

Be connected: your entire organisation on one system

View information from across multiple offices in one system, for easy and effective financial management and an instant holistic view of your performance.

A high level of security

Empower your organisation with the highest level of security and superior protection of your data in the Cloud.

GDPR-ready provider

You can rest assured that you are supported by a future-focused Cloud provider, committed to assisting you journey towards compliance with key legislation such as GDPR. We can help you reimagine your organisation in the digital age to ensure continued success and effective growth.

Specialist sector functionality

We have experience working with organisations from varying sectors such as charities, schools, colleges, NHS trusts and social care organisations. We have sector specific functionality, such as charity SORP and SOFA reporting capabilities, built into the system to enable you to comply with minimal effort.
