

Laserform Market-leading Form Software

Laserform is widely regarded as one of the most respected providers of electronic legal forms, digital submissions and checklists to the legal sector.

The Laserform software solution offers over 2,000 legal practices, from sole practitioners to the Top 100, multiple time-saving and accuracy-boosting features, assisting users to work with both speed and accuracy.

Laserform contains multiple efficiency and risk management functions including: PDF emailing facility, Context Sensitive Help, expandability, clause libraries & autotexting, complex calculations, Word text editing including legal numbering, automatic databases, template forms creation, easy searching and navigation, screen notes function, forms toolbar shortcuts and forms bundle.

Laserform Library

The comprehensive library of over 2,300 of the most regularly used and non-prescribed forms covers all legal areas, including a range of forms specifically for use in Scotland and Wales, and Laserform offer a bespoke forms creation service, upon request.

With such a broad range of forms available Laserform includes an Automatic Update service to ensure the latest are used.

Laserform Hub

The world is going digital, and so are forms. In 2011 the government announced its Digital by Default strategy changing the way that legal forms would be submitted.

Whilst government agencies provide digital submissions portals, they are geared to occasional use and lack the features and performance that firms need to drive efficiency.

The new Laserform Hub solves this problem. It has been designed with you and for you, with additional features to reduce form completion times, manage compliance, and provide valuable reporting information.

IHT400+

IHT400+ comprises all 25 HMRC IHT400s, linked together as one intelligent file for automatic data population and calculation. Forms are easily accessed and linked using the hyperlinked index.

As information relating to the deceased is added or amended to the IHT400, it automatically filters through to the supplemental forms and calculates the inheritance tax due on the estate.

"Laserform has a wide range of forms & productivity aids are constantly being added and existing features enhanced."

Laserform

LFormInet

Laserform is also available in browser based format, LFormInet, for intranet based organisations who need their forms application delivered to them via a browser.

LFormInet allows for the distribution within your practice of only the most recent and relevant electronic forms direct to your users on demand from a single central source.

FormHelpAdmin

An additional module to Laserform is FormHelpAdmin, a unique in the industry help facility.

FormHelpAdmin allows your Laserform users to press F1 from anywhere within a form and be presented with relevant information and files that have been created in-house by PSLs or knowledgeable legal experts.

This easily accessible knowledge assists the completion of forms by linking instantly to guidance on in-house style, know-how, clause libraries and knowledge bases.

LitPro Checklists

LitPro procedural knowledge management checklists provide step-by-step guidance throughout all stages of the litigation process, which ensures that key steps are taken at the right time in the right way, minimising mistakes.

They can be used as a reference tool or populated with fee earner comments, inhouse knowledge, barristers' advice and supervisors' notes. All checklists can also incorporate hyperlinks direct to know-how, relevant forms, legal compliance websites and other relevant websites.

A fully completed checklist offers a comprehensive snapshot of all in-progress cases within your practice, including which actions have been completed and which are still outstanding.

Such information is accessed instantly, assisting both fee earners and supervisors to review and track case progress.

Complimentary Support Services

Laserform's complimentary support services include full support through implementation and beyond, online services for immediate forms downloads, and advanced information services, which provide early notice of form changes along with timescales for implementing change.

You have free access to Laserform's technical help desk and dedicated customer care team, to assist you with any technical or account-related enquiries.
