How Yearsley Food
has saved time and
money with Advanced

CASE STUDY

Client
Yearsley Food

Industry
Logistics

Project
Improving time management
and payroll efficiency

Introduction

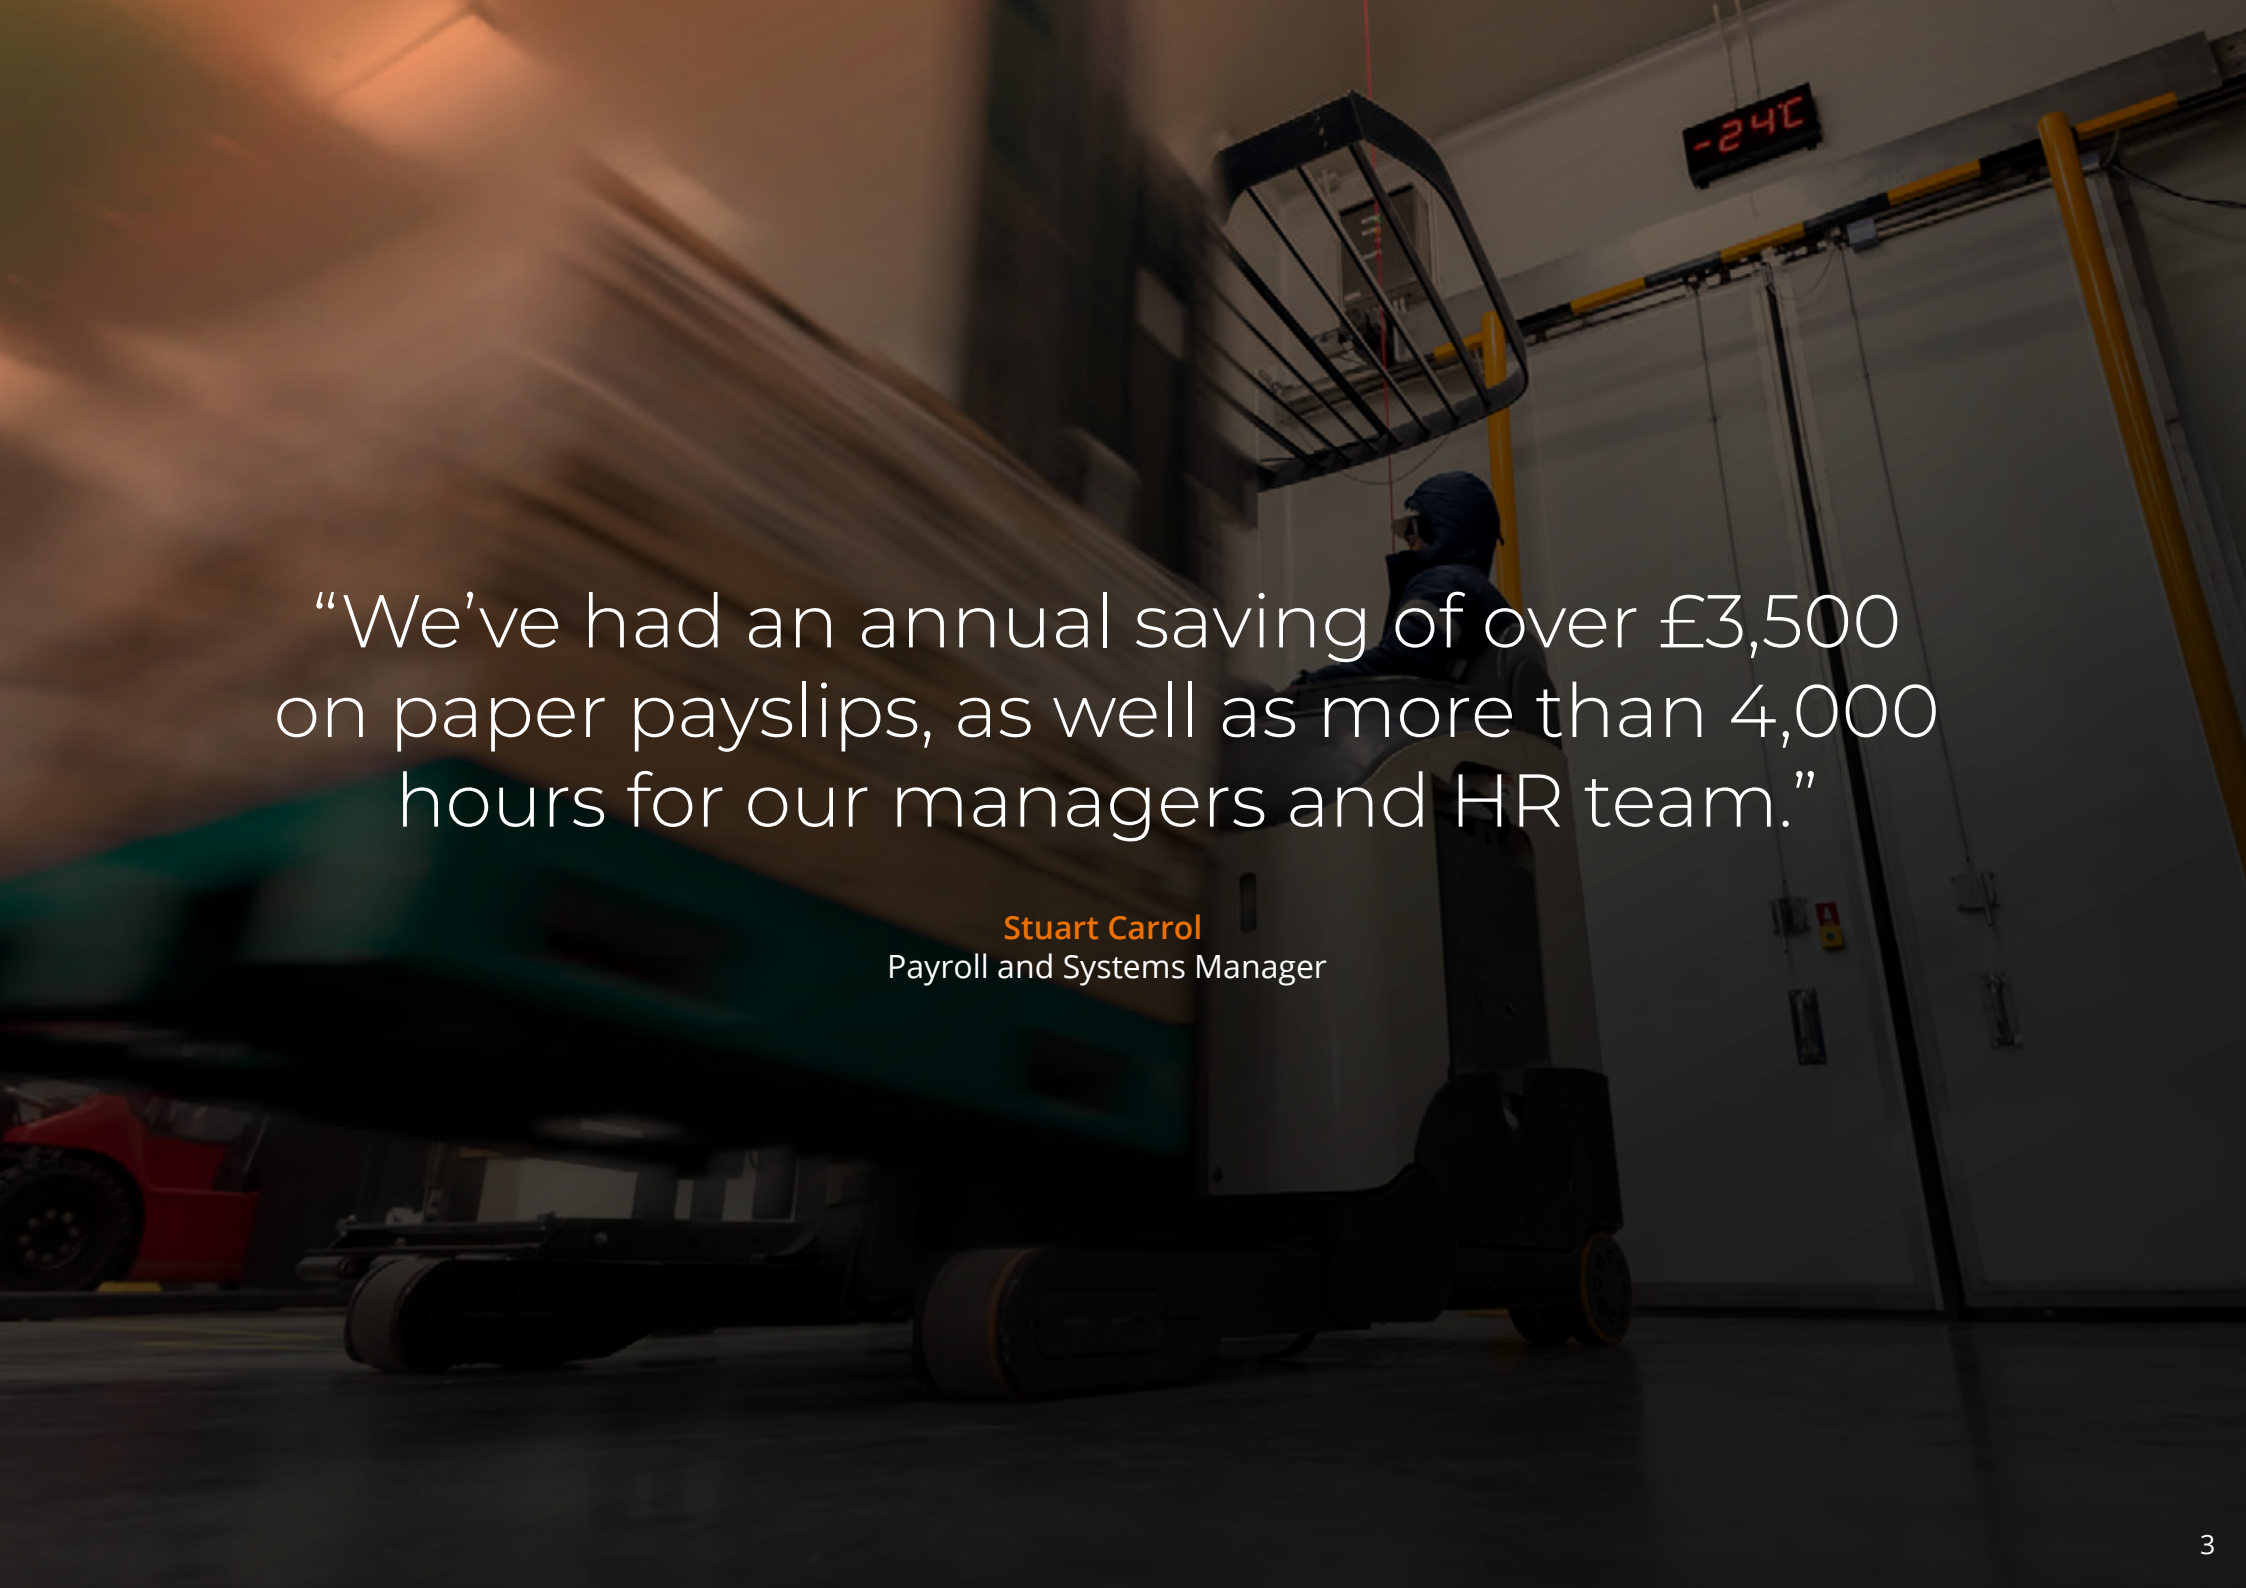

Yearsley Food, the UK's largest provider of supply chain solutions in the frozen food sector, has been working with Advanced for over 20 years. Here's how our solutions have helped them manage their workforce, in the company's own words.

A large and complex business

At Yearsley Food, we provide frozen food sales, storage and distribution services for retailers and wholesalers across the UK. Since 2000, our complex business has been supported by Advanced's time and attendance software, as well as their payroll system, Flexipay.

With Advanced's time management system, our employees can self-service, meaning they can book absences, track allowances, update their personal information, and even request and swap shifts. What's more, staff can clock in remotely via their mobile devices.

A worker in a blue uniform and safety gear is operating a scissor lift in a warehouse. The lift is extended upwards. In the background, a train is blurred, suggesting motion. A digital display on the wall shows -24°C. The scene is dimly lit with a warm, orange glow from the left.

“We’ve had an annual saving of over £3,500 on paper payslips, as well as more than 4,000 hours for our managers and HR team.”

Stuart Carrol
Payroll and Systems Manager

Efficient payroll

Flexipay provides us with fast and accurate payroll reporting – which is vital for a business of our size. With help from Advanced, we have put together a report that exports basic clocking-in data into Flexipay, nearly eradicating the need for manual input. Today, employees at all 13 of our sites can clock-in using the system, which is sophisticated enough to calculate average pay and hours for a wide range of shifts. It can even take into account differing rules across sites and departments.

“It means that we’ve cut the four hours of manual data entry each week in half! We now spend two hours each week checking the system to reduce queries, ultimately saving us a further two to three hours per week. Another huge benefit is the function of automated reporting for managers to assess absence records, for instance, enabling managers to save further time on creating and populating reports and spend more time on their daily duties.” Stuart Carroll, Payroll and Systems Manager

Saving time and money

Advanced’s solutions have saved our business a significant amount of time and money. We’ve had an annual saving of over £3,500 on paper payslips, as well as more than 4,000 hours for our managers and HR team. And even better, we’ve given our employees a sense of empowerment and autonomy, which has built an improved working ethos and environment.

“We’ve cut the four hours of manual data entry each week in half!”

Stuart Carroll, Payroll and Systems Manager

We would love to hear from you
