

## Laserform Market-leading Form Software

**Laserform is widely regarded as one of the most respected providers of electronic legal forms, digital submissions and checklists to the legal sector.**

Laserform supplies over 2,000 legal practices, from sole practitioners to the Top 100, with multiple time-saving and accuracy-boosting features, assisting users to work with both speed and accuracy.

Laserform contains multiple efficiency and risk management functions including: PDF emailing facility, Context Sensitive Help, expandability, clause libraries & autotexting, complex calculations, Word text editing including legal numbering, automatic database population, template forms creation, easy searching and navigation, screen notes function, forms toolbar shortcuts and forms bundling.

### Laserform Library

The comprehensive library of over 2,300 covers all legal areas, including a range of forms specifically for use in Scotland, Wales and Northern Ireland. Laserform also offers a bespoke forms creation service, upon request.

With such a broad range of forms available, Laserform includes an Automatic Update facility to ensure the latest versions are used.

### Laserform Hub

The world is going digital, and so are forms. In 2011 the government announced its Digital by Default strategy, changing the way that legal forms would be submitted.

Whilst government agencies provide digital submissions portals, they are geared to occasional use and lack the features and performance that firms need to drive efficiency.

Laserform Hub solves this problem. It has been designed with you and for you, with additional features to reduce form completion times, manage compliance, and provide valuable reporting information.

### IHT400+

IHT400+ includes all 25 HMRC IHT400s, linked together as one intelligent file for automatic data population and calculation. Forms are easily accessed and linked using the hyperlinked index.

As information relating to the deceased is added or amended to the IHT400, it automatically filters through to the supplemental forms and calculates the inheritance tax due on the estate.

*"Laserform has a wide range of forms & productivity aids are constantly being added and existing features enhanced."*

# Laserform

## Laserform Intranet

Laserform is also available in browser based format, Laserform Intranet is for organisations who need their forms application delivered to them via a browser.

Laserform Intranet can be deployed seamlessly to multiple users across multiple offices.

## Complementary Support Services

Laserform's complementary support services include full support through implementation and beyond and advanced information services, which provide early notice of form and legislative changes along with implementation timescales.

You will also have free, unlimited, access to Laserform's technical help desk and dedicated customer care team, to assist you with any form related, technical or account-related enquiries.
