Coroners Hosted Services
Secure, Scalable, Accessible & Cost-effective

Coroners Hosted Services from Advanced provide your coroners' office with secure, remote access to the marketleading coronial management system, delivering a secure system that ensures a high return on your investment.

The Coroners hosted solution eliminates the need for costly IT resources and infrastructure, by hosting your core software applications in our secure, scalable data centre.

The remote nature of the application enables members of your coroners' office to access the systems from any location anywhere in the world.

Updates are loaded automatically, enabling you to take advantage of the latest software enhancements – all for a simple low monthly cost per user. bundle.

Overview

Our data centre has been designed to host your software applications on dedicated, powerful servers in a highly secure and scalable environment.

Access is simple with a secure internet connection. Once connected to the remote server, you will be able to run the Coroners system as if it were loaded onto your own computer.

System Capability

Our Coroners solution is supplied to over 85% of Her Majesty's Coroners of England and Wales. The functionality within the system comprises:

> Comprehensive database of all reported death details

> Facility to produce all necessary statutory documentation to hold an inquest

> Provision of appropriate certification documentation for death registration

> Expenditure management incurred by death investigations

> Production of annual returns for central and local government

> Bespoke reporting and analysis of data entered onto the system

> Import data from external sources to improve data management.

"Laserform has a wide range of forms & productivity aids are constantly being added and existing features enhanced."
