

Advanced e5

Empower you and your colleagues to meet your organisation's requirements, industry standards and best practice procedures; our solution delivers comprehensive reporting, finance, procurement and receivables management.

The challenges

Finance professionals face increasing demands, including; ensuring the effective running of their organisation, managing income and inventory to procurement and assets, scrutinising data for key decision-making processes and reporting to vital stakeholders. As a result, they are consistently met with considerable pressure on their time, effort and resources.

The solution

Delivering effective management of end-to-end accounting processes in one fully integrated system, our solution is flexible and scalable to your industry and organisation's requirements. With extensive functionality, enhanced modules for specific sectors and powerful reporting capabilities; finance professionals are able to efficiently meet increasing demands and drive business success.

The benefits

Sector-specific enhancements

Built with your organisation in mind. Our solution is adaptable and scalable to your needs; from enabling Higher Education institutions to easily manage research project proposals, to lessening the burden of financial settlements for Airlines, following passenger disruption. Alongside these sector-specific enhancements, our technology also boasts powerful core functionality. This functionality includes a robust General Ledger, optimised for the intricacies of enterprise-level accounting and Financial Services users. Further user customisation is possible in our solution, both during and following the implementation process; so your system can adapt as your business changes.

Powerful reporting

The extensive suite of standardised and configurable reports enables you to easily meet internal, statutory and regulatory reporting requirements, regardless of complexity, providing you with instant data analysis for incisive decision making.

Deployment options to suit your organisation

In addition to being deployable as a typical on-premise solution, our technology is also available as a cloud based solution. Through hosting and managing the solution in the cloud, users can simply login to the application online, reducing operating costs and boosting efficiency. The availability of various self-service mobile-enabled applications, also accommodates the growing demand of the mobile workforce, meaning that users no longer need to be at their desks to make a procurement decision, or to approve an invoice.

Your business in one system

View data from across your organisation and gain a holistic view of your business performance.

On demand insight, optimising your decision-making processes

Equips users with an extensive suite of intuitive and customisable dashboards and screens, collating, condensing and presenting up-to-date status information, for instant analysis. Finance professionals can quickly and easily share information with key stakeholders, and effectively drive sharper financial decisions.

Supporting standards and quality

Our solution is supportive of your organisation's compliance requirements, meeting professional standards of quality to enhance your organisation's performance and drive success.

"We now have a single version of the truth with staff able to access one accurate, up-to-date source of data. With electronic purchase-to-pay processes we have greater visibility of spend and can ensure compliance. By choosing to have our solutions hosted by Advanced we were able to take advantage of their resources and expertise on this complex project."
