

Advanced ProMetrix Flexible Dashboard Solution Displaying Key School Performance Indicators for all staff

A stylish web-based dashboard, easy to use & roll out, includes a comprehensive suite of reports, displays data from both facility & other educational products

Introduction

Advanced ProMetrix is a web-based dashboard giving teachers and senior leaders access to school performance indicators in an attractive and concise format.

The product includes a suite of reports based on key areas of the system ensuring that staff can immediately see data about the learners they educate. The reports are based on data from the Facility database but can also include data from other systems including spreadsheets ensuring the data that teachers need is viewable from one single place.

In addition schools can chose to build their own reports which are displayed as gauges or charts on the dashboard. General users can see the reports that have been selected and configured by the administrator giving a uniform view of data to staff. Advanced users can produce personalised dashboards tailored to their role in school displaying significant information. The report viewer can be opened from each report to allow the data to be interrogated further, this can include drill through to other reports giving a user great insight. The reports are displayed as gauges or charts on the dashboard. General users will see the reports selected and

Key Points

- > A Stylish Web-Based Dashboard - The appearance of the dashboard can be customised using a series of in-built themes and by displaying your school logo.
- > Easy to Use & Roll out - The administrator can quickly create a dashboard using the included reports and roll it out to all users. Further reports can easily be added overtime. Different dashboards can be created for different types of user (eg. SMT, Heads of Department etc.)
- > Includes a Comprehensive Suite of Reports - from key areas of the system including attendance, behaviour and assessment. These reports are immediately ready to be added to a user's dashboard.

Web Based Dashboard
