

Have you got your catalogue under control?

Maintaining product and supplier data can require significant resources. At Advanced, we know there are many benefits associated with purchasing through an electronic catalogue (eCatalogue). We are able to offer a catalogue management service based on years of experience managing supplier data..

Product >
Catalogue Management

Release Version >
Version 1.0

Date >
06/04/18

What we do:

- > Aim to reduce off-catalogue orders by increasing the number of orders raised through the Advanced catalogues to at least 80% of purchase orders
- > Fully manage and maintain all catalogues including loading in new data, deleting old data and improving the general quality of the data
- > Manage a supplier control renewal schedule to ensure up-to-date products and pricing are available for requisitioners in a timely manner
- > Analyse your spend on-and-off catalogue providing you with savings recommendations and general improvements which can be made to the catalogue

Doing more for less

"It would be really difficult to achieve the step-up in performance required with a single employee. One of the big draws for me when choosing this service was having access to a pool of people with the appropriate skill-sets to improve the Trust's transactional purchasing performance far more quickly than we could do ourselves... and for less than the cost of a full-time employee!"

Jane Christopher, Head of Procurement, Wirral University Teaching Hospital NHS Foundation Trust

Savings

Jane Christopher, Head of Procurement, Wirral University Teaching Hospital NHS Foundation Trust

"Sometimes the pressure to deliver big savings means that the small change can get overlooked, so the monthly Spend Analysis service will be really beneficial in identifying savings opportunities by switching from catalogued items to NHS Supply Chain and vice versa quickly and regularly. Similarly, being able to identify and manage off-contract spend more effectively, without it becoming an administrative burden for the Procurement team will help the Trust to improve contract compliance and reduce contract leakage. It provides contracted suppliers with more volume assurance which in turn results in better pricing for the Trust."
