

## The Advanced SharePoint Health Check

For nearly every organisation, SharePoint has organically evolved from an ad-hoc departmental solution for document sharing, to a business-critical system. It holds vital information such as project plans, customer proposals, key forms and policies, and is the backbone for several workflows and business processes.

As a vital system supporting your organisation, SharePoint needs to be aligned to your business objectives and run effectively. However, because of the organic growth of SharePoint, most organisations do not have appropriate plans in place for SharePoint with respect to business continuity, ease of use, strategic benefits or disaster recovery.

### The Advanced SharePoint Health Check includes:

- One-day on-site Health Check assessment
- One-day write-up with conference call to review the findings and plan next actions

### Why the Advanced SharePoint Health Check?

The Advanced SharePoint Health Check is a short, sharp, precise exercise to uncover areas that need to be addressed, or confirm your SharePoint environment is managed successfully. This will support

your business' ability to operate as normal, regardless of the situation, as well as succeed. The Health Check will provide you with a short and succinct report from which you can immediately create an action plan to preserve and enhance a vital but often overlooked system.

### Our Partnership with Microsoft supports our Partnership with you

With a team of highly qualified and experienced Microsoft SharePoint consultants, Advanced have the expertise to support you and your organisation in any remediation activity after the Health Check. We can also provide the development and optimisation of your SharePoint environment. Advanced understand how vital SharePoint is to the day to day operation of your organisation and as we support our own applications within your business, we are the obvious choice to manage and support your SharePoint environment.

## How the Advanced SharePoint Health Check can help you

How the Advanced SharePoint Health Check supports our Business Alignments	
Are you concerned about the stability and continuity of your system?	Advanced will fully review your system. We will highlight any 'danger areas' that could have an immediate impact upon your business, and create an action plan to prevent that.
Do you feel the need to put a support system in place?	Advanced will work out the support effort that ought to be required. We will identify any issues that need immediate attention to make them supportable, before facilitating a support handover.
Are you maximising the benefits that SharePoint can offer your organisation?	Advanced will review your current business needs and how your use of SharePoint meets those needs, before making specific recommendations. We will also deliver an Art of the Possible presentation that is tailored to your business and unique implementation.
Are you concerned about what you can do to fix user complaints about speed, bugs and usability?	We will perform a detailed investigation into your current pain points, and build a plan to install improvements.

## How the Advanced SharePoint Health Check supports your Business Alignments

<b>Are you looking to upgrade your SharePoint solution and the impact that will have on your integrations and customisation?</b>	Advanced will review your environment, and complete a technical upgrade assessment. From this, our experts will be able to advise how best to move forward.
<b>Are you concerned about the timelines and risks involved in an upgrade?</b>	Advanced will use automated tools to discover any non-standard customisations that could add risk to your upgrade. Mitigating these risks will then be included in your upgrade roadmap.
<b>Do you need support in creating your roadmap to the Cloud? Are you concerned your technology will not be able to migrate?</b>	Advanced will evaluate the Cloud Readiness of your SharePoint, and our experts will recommend a route forward.
<b>Are there any new technologies and admin tasks you need to be aware of to best manage the implementation of the Cloud into your organisation?</b>	Advanced will use our extensive experience in Cloud management to highlight the changes required from moving from on-premise to the Cloud. As a certified Microsoft Cloud Solutions Provider, we can fully support this journey.

### Advanced's Pace Programme

We offer our customers a personalised route to the future, enabling and encouraging them to be agile and act with Pace.

The Advanced Pace Programme offers an easy way for organisations of all sizes to adopt new technology. We cover all of the essentials you need: implementation, training, licenses, support and updates and enhancements to ensure your organisation can scale and grow.

Through our vast experience, we understand the different needs that individual organisations have. This is why our Pace Programme delivers a breadth of options and support.

Working closely with you and keeping your goals at the centre of planning, a route forwards using Cloud technology will be developed. If a Public Cloud environment is deemed to be best for your organisation's solution, our SharePoint team will be there for you. Currently, we Microsoft have certified over 60 members of our teams and awarded us 63 Gold Star specialisms.
