

## Cloud HR

We understand that most HR teams get bogged down in endless admin tasks, their attention diverted away from increasing employee engagement, wellbeing and productivity. Now more than ever before, there is an expectation that HR teams are strategy pioneers, not task robots, who push their organisations to live up to changing demands and expectations.

That's where Cloud HR comes in. Designed for HR teams looking to revolutionise the way they work and adapt to rapidly changing workforce demands, our HR solution helps you make HR more human and focus on what matters, your people.

### Why the Cloud?

In the digital age, employees have an expectation that business systems are just as accessible as the technology they use at home. In the age where information is accessible at our fingertips, it should be different in the workplace where employees expect to be able to use solutions with no training that is user friendly.

This fundamental change in employee demands is crucial for HR teams. Using out dated, clunky technology across the business is a red flag and a blocker to employee happiness at work. In addition to this, outdated technology makes simple administrative tasks lengthy and unnecessarily complex, for both employees and HR staff. Using systems which promote paper and desktop working means basic HR processes are limiting and take up time which could be spent investing in the employee experience.

### The solution

Our solution brings 30 years' worth of experience with HR teams using technology built for tomorrow. Cloud HR allows users to easily and effectively manage the full lifecycle of their workforce. It offers a broad suite of core HR

functions, ranging from absence to training management and customisable reports, with extensive and configurable workflow capabilities to enhance your organisational efficiency. Your employees are also empowered with instant Cloud access, anywhere, anytime. Using Cloud HR, your HR department can benefit from customisable self-service functions, enabling users to effectively raise annual leave requests and manage their employee records. In addition to successfully managing your workforce, the solution provides you with the peace of mind that you are consistently compliant to HMRC regulations and statutory reporting requirements.

# Cloud HR

## MyWorkplace

Cloud HR is available on our overarching platform, [MyWorkplace](#), which enables HR teams, line managers, and the general employee population to quickly action core tasks and activity without having to dive in and out of countless apps or programmes.

## Advance Virtual Assistant (AVA)

AVA takes care of the repetitive and manual tasks, to help you employees focus on strategy and to make a real difference. AVA will boost employee engagement while making work easier by surfacing information your HR team needs, as they need it.

## The Benefits

### Optimising workflow processes

Our system automatically manages organisational processes such as; performance reviews, including 360 degree feedback, changes to employee details, holiday and absence management, on boarding and leaver processing, training and skills requests alongside maternity/paternity and shared parental leave management. In doing so, it removes the need for paper or spreadsheet entry, reducing time spent on repetitive manual process and freeing up your employees to be more productive.

### Scalable and flexible to your needs

With highly configurable screens, automated calculations, intranet pages and workflows, our solution is highly flexible to your needs and scalable as your organisation grows. Unlike other competing solutions, configuration can be carried out by us at Advanced or by users themselves. They are supported by our dedicated team for total personalisation. This therefore provides you with the peace of mind that you are consistently improving your business performance and are equipped to manage future challenges. Self-service HR management instant online record access for employees and managers, allows all users to amend personal details, view their historical personnel data in full, log holiday, annual leave and training requests, manage maternity/paternity leave and view calendars. Managers are also empowered with a team view function, enabling them to quickly and easily view and manage assignments. Online staff management equips users with an online staff management portal, allowing for quick view and maintenance of employee records and access to a full historical view of employment events per employee, anytime and anywhere.
