Crosscare
Clinical patient management

We are a leading provider of clinical patient management software used by over 70 adult and children's hospices across the UK. Our modern solution helps you to reduce your paperwork, improve efficiencies and spend more time with your patients.

Our team of product experts have been developing Crosscare for over 15 years, to ensure that it meets the administrative and clinical needs of your hospice. It is now the most widely used clinical system in the market.

Features

Facilitating both adult and children's hospices Crosscare is a flexible and configurable solution that can be tailored to your individual needs.

Simple and easy to use

Providing you with an intuitive and simple to use interface, our solution is easily adopted by users of all levels, allowing you to see workforce efficiencies immediately. Training packages are also available allowing you to gain the most from your software.

The advantages include:

> Intuitive & simple interface

> Easy to use

> Bespoke training packages

Hospice Adminstration

Our hospice administration module allows you to cater for incoming referrals and multiple, concurrent episodes of care. You can cater for referral details, carers, friends and family members together with clinical requirements, special alerts and reminders.

Effective team management

Our solution allows you to effectively manage your team, ensuring that you work both effectively and efficiently. With a full rostering and hospice at home module nurse shift patterns can be scheduled for both the in-patient and homecare teams.

The advantages include:

> Effectively manage staff schedules

> Monitor sick and annual leave

"Our partnership with Advanced is a significant step forward for the Trust which will improve our healthcare delivery. The new system will securely capture relevant data given to us by service users and the staff who are caring for them"

Dr Kay Macdonald > Clinical Academic Director > Sussex Partnership NHS Foundation Trust

Clinical patient management

Comprehensive reporting

We realise the importance of analysing and evaluating your hospice activity and to accurately create reports for key stakeholders. This is why we provide you with a fully comprehensive reporting tool that allows you to report how well you are managing your hospice as well as being able to provide annual Minimum Data Set (MDS) reports required by the National Council of Palliative Care.

Spending more time with patients

We understand that you need to spend more time with your patients. Our integrated mobile solution allows you to access patient records on mobile devices, eliminating the need to carry paper records. With the ability to update patient records whilst on the move, you can spend less time travelling between patients and the office and spend more time with your patients. The Advantages include:

> Improved patient experience

> Reduced travel time

> Reduced paperwork

Benefits

Flexible & configurable:
The solution can be adapted to suit the needs of each individual Hospice.

Improve efficiencies:
Through software developed specifically to streamline your day to day tasks.

Reduce paperwork:
With integrated hospice administration, staff management and rostering modules available.

Improved reporting:
Our proven tools provide valuable data and analysis to manage the hospice and annual Minimum Data Set (MDS) reports required by the National Council of Palliative Care.

Integrated mobile working:
Community and hospice at home teams can access and update patient records whilst visiting patients.
