

MLC Case Collaboration

Boost your chambers performance with a modern 24/7 Cloud platform that delivers the freedom to share information, and collaborate

Smooth worksharing

Using MLC's Case Collaboration functionality, chambers can hold data securely in a centralised and fully encrypted digital environment. With Microsoft 365 and Adobe Acrobat integrations, authorised users can store, access, create and amend legal documents and collateral, in almost any format.

No matter where they're working, barristers and clerks can conveniently deposit and access data quickly and easily. By providing a significant uplift in efficiency, barrier-free collaboration gives you a platform that will help you consistently deliver an exceptional level of client service.

Your clients can also benefit. An incorporated Solicitor Share Facility offers clients the ability to directly upload any case related documents into a secure collaboration vault. This includes individual documents, bundles, and even images, audio, or video files.

Compliance and security simplified

Case Collaboration enables multiple people to work on a case, using a secure, encrypted method of communication and collaboration. MLC allows you to prioritise client data security with central administration rights that assign permissions to individuals and ensure you're always in control of user access.

This solution offers a secure alternative to the risks of saving data locally on internal systems or in paper format. Compliance is also assured, with built-in General Data Protection Regulation (GDPR) facilities and data retention policies that ensure data remains fully compliant. Your documents remain secure and confidential, but are always available whenever and wherever they are needed.

Paperless cost savings

The costs associated with large quantities of paper add up very quickly. Using Case Collaboration will remove expensive, slow, and inconvenient paper-based work processes, and replace them with dependable, streamlined procedures. You'll also increase your chambers referenceability by improving environmental performance, and demonstrating a conscious approach to the impact your provision of services has.

Key benefits:

- Cloud functionality ensures data is always secure and accessible
- Drives fast, efficient task completion
- Offers full collaboration capability for clerks, barristers, and clients
- Security and compliance assured
- Supports paperless work methods
