

ProAchieve

Our marketing-leading solution for analysing learner achievement, retention and pass rates.

The challenge

At Advanced, we understand that improving outcomes, measuring progression and retaining learners is your main goal as an organisation. Having the right information available is key to keeping learners on track and ensuring that they meet their potential.

The solution

Our solution, ProAchieve, provides you with the vital information you need around achievement, retention and pass rates, while ensuring you remain compliant with ever-changing and demanding government and inspection standards.

Use this valuable information to drive improved learner and organisation performance. Ideal for Further Education (FE) colleges and all types of private training provider, it's no surprise that over 90% of all FE colleges in England have chosen ProAchieve.

The benefits

Flexible reporting

Customise and interrogate pre-existing system reports, or create your own for different organisational levels such as site, faculty, department or team.

You can easily create learner, enrolment, retention, achievement and pass rate reports

to share key information with learners, staff and other stakeholders.

The flexible reporting options allow you to:

- > Select your own grouping and statistical fields to summarise
- > Report on up to 20 user defined fields
- > Save as personal or system-wide reports
- > Drill-down to enrolments

With graph functionality, present your reports in a visually appealing way, helping to promote a deeper understanding of the information, and share key information with stakeholders in a format that suits their needs.

Maintain a high quality level of statutory compliance and be ready for inspection

Ensure compliance, generate funding and avoid penalisation with accurate, timely Individualised Learner Record (ILR) and exam submissions.

At Advanced, we regularly update our solutions to reflect the changing data services and OFSTED requirements to enable you to meet inspection standards.

You can easily create a pre-inspection report, including the national average data, and compare your results directly against published Education and Skills Funding Agency (ESFA) reports.

ProSuite Implementation

"Implementing integrated systems from one supplier is a simple way to deliver the efficiencies that all colleges are seeking."

Utilising this focused technology and working with specialist partners like Advanced enables us to monitor and track students' activity and deliver the quality education they deserve."

ProAchieve: analyse learner achievement, retention and pass rates

Utilise ILR data

ProAchieve can be used to turn your ILRs into valuable information for your organisation. By replicating a variety of ESFA and OFSTED reports, you can see clearly how well your college is performing across year groups and whether your organisation is on track.

You can view learning aims and learner data from the ILR, as well as funding data from the Funding Information Suite (FIS) and Provider Financial Report (PFR) files. Using ProAchieve means you can look up values such as demographics and learner details, plus use the extensive data filtering functionality to highlight key information to facilitate the drive to improve student and organisational performance.

Scalable solution that can grow with you

We offer optional modules and customisable, in-depth reporting and analysis so that our solution can be tailored to suit the needs of your organisation and your learners, and grow with you. Optional modules include:

- > Learner Responsive
- > Employer Responsive
- > Higher Education
- > Funding
- > Planning & Modelling
- > Target Setting
- > Trend Analysis
- > Mapping
- > Web

Integrating with the other products in our ProSuite gives you a full picture of your learner information, and a solution designed specifically to your requirements.

Marsden says, "Implementing integrated systems from one supplier is a simple way to deliver the efficiencies that all colleges are seeking."

Think ahead for continued improvement

Take a course, programme, department or whole organisation view by utilising key information to enable effective performance management, highlight significant trends, learner achievement and retention across different areas.

Drill down into individual courses and learner profiles to ensure learners are achieving their full potential and target grades across multiple year groups within the organisation, while implementing the latest funding and performance methodologies.
