ProSolution

Empower your users with our responsive and intuitive Management Information System (MIS), specifically designed for Further Education (FE) colleges, councils and private training providers.

The challenge
The focus for all educational organisations is ultimately to improve teaching and learning. At Advanced, we understand that colleges, councils and private training providers are facing increased challenges to reach this goal. With inadequate funding, compliance and inspection pressures, education providers need a solution they can trust in times of uncertainty.

The solution
With our flexible, intuitive MIS, ensure the right information is available to the right people at the right time to support your learners and make informed decisions in real-time. With ProSolution, you can work smarter and more efficiently, accessing all of your key learner information in one simple-to-use system. Handle enquiries and applications with ease, remain compliant and efficiently produce data required for accurate funding claims.

The benefits
Save valuable time and support future growth
Effectively manage your learners and their data from initial enquiry through to application, enrolment and beyond.

Automate your back-office administration processes with ProSolution. Reduce staff workload and paper-based processes whilst providing staff with the key information they need, when they need it. Save valuable time, drive efficiencies and control your administrative costs as your organisation expands.

Deliver successful apprenticeship programmes
After recent changes to apprenticeships, we understand you need a robust, manageable system that can support future growth and both your current and future apprenticeship offerings. Efficiently manage apprenticeship levy payments and contributions from both government and employers, produce data for accurate funding claims and remain compliant, all from within your MIS.

Increase admissions and funding with accurate targeted marketing campaigns. With easy access to your apprenticeship learner data, you can share feedback to key stakeholders, from assessors and apprentices to managers and employers, and help drive improved retention and programme success.

Implementation

“We have gained enhanced levels of visibility and reliability of data relating to 5,000 registers which ensures teachers are paid on time as they can quickly mark all learners in a timetabled class.”

ProSolution

Think ahead with powerful reporting
ProSolution holds a wealth of powerful information. The reporting features built into the system provide simple methods for turning data into meaningful information, whether it be for learners, governors, principals, department heads, tutors, assessors or employers. Both standard and user-defined reports are seamlessly integrated into the system and can be accessed from a web browser or the Windows application. Work smarter and act faster with easy access to valuable learner data.

You can share this information in a number of different formats - including tables, exports, graphs, gauges, letters, emails and SMS text messages - to ensure your stakeholders have easy access to the information they need in a format that works for them.

Improve efficiencies with organised timetables, registers and exams
Co-ordinate a complex free timetabling process with intelligent clash detection. Significantly reduce administration time and scope for error with our solution.

Do you manage multiple sites, or have learners visit external locations as part of your course programmes? With ProSolution, registers can be taken on smartphones, tablets, laptops or desktop PCs to ensure that teaching staff can record attendance wherever the learners are.

The exams module helps to give order to otherwise long-winded processes. It lets you manage exams efficiently by importing awarding body base data. You can also import and export results and exam submissions.

The Seating Plan Wizard understands room layouts, making it simple to plan for any special requirements. It supports multiple papers and can produce a variety of paper outputs depending on your requirements.

Manage Additional Learner Support and Learner Support Funding
ProSolution allows staff to record details of learners receiving Additional Learning Support and the associated costs. The required documentation can be produced and the relevant fields in the Individualised Learner Record (ILR) are automatically populated, removing the need to re-enter the learner’s details and the risk of duplication.

Easily manage bursary funding paid to learners. Set any number of expenditure categories, record the funds agreed against learner profiles and compare with those paid to them. You can also link an electronic register to compare their total attendance before authorising payment.

Scalable solution that can grow with you
We offer optional modules and customisable, in-depth reporting and analysis so that our solution can be tailored to suit the needs of your organisation and your learners and grow with you. Optional modules include:

- Enquiries and Applications
- Timetables
- Registers
- Mobile registers application; available on Android, iOS and Windows Mobile.
- Change Requests
- Exams
- Reporting
- ILR Workshop
- Learner Support Funds
- Additional Support
- Accommodation
- SMS

“Reducing paper-based processes has dramatically improved efficiency and reduced the risk of vital information disappearing into a black hole.

Requests to change personal information or to withdraw and transfer learners can be immediately made online by teaching staff and then actioned or rejected by MIS staff, without the need for re-keying.”
